Michigan Public Library Statistics 1985

INTRODUCTION

The Library of Michigan has just completed a compilation of the statistics for Public Libraries and Library Cooperatives. This information is provided from applications filed by February 1, 1985, and reports the data of the last completed 12 month operating year of the library agency.

The Public Library Statistics are divided into five separate reports with libraries grouped according to the population they serve. The five reports cover the areas of *income, operating expenditures, resources, resources and services* and *audiovisual resources* holding information on public libraries.

Following the five statistical reports are two **summary tables**--the first table provides *TOTAL statistical information* on each public library group--the second table provides *AVERAGE statistical information* on a "typical public library" for each public library group.

The next section of this publication provides *geographic, directory,* and *general statistical information* on regional and subregional libraries serving the Blind and Physically Handicapped in Michigan.

Dear Colleague:

I am pleased to share with you the revised Michigan Public Library Statistics 1986.

The statistical information is provided from applications filed by 1 February 1986, and reports the data of the last completed 12 month operating year of the libraries.

The Michigan Public Library Statistics are divided into five separate reports with libraries grouped according to the population they serve. The five reports cover the areas of income, operating expenditures, resources, resources and services and audiovisual resources holding information on public libraries. Following the five statistical reports are two summary tables--the first table provides TOTAL statistical information on each public library group--the second table provides AVERAGE statistical information on a "typical public library" for each public library group.

In addition, statistical information is provided for the public library cooperatives, and regional and subregional libraries serving the Blind and Physically Handicapped in Michigan.

I hope that you will find this publication useful and informative.

Sincerely,

James W. Fry

James W. Fry
State Librarian

Michigan Public Library Statistics 1986

Library of Michigan

Dear Colleague:

__Michigan Public Library Statistics 1987__ is a compilation of information filed with the Library of Michigan by 1 February 1987. The data covers the latest 12 month operating year of the libraries.

Five separate reports are grouped according to the size of the population served. The areas of income, operating expenditures, resources, resources and services, and audiovisual resources are targeted. Two summary tables are also included. The first summary table shows TOTAL statistical information on each public library group. The second table provides AVERAGE statistical information on a "typical public library" for each public library group.

Statistical information is also given for public library cooperatives, regional and subregional libraries serving the blind and physically handicapped in Michigan.

I am pleased to present this report to you and hope you will find it a valuable resource.

Sincerely,

James W. Fry

James W. Fry
State Librarian
